PILOT MP 105

Amplified USB/SD/CD/RDS/Bluetooth car radio

4x55W

MP3
Album & track control

The MP 204 BT model is a upgraded version of the MP 104, offering a CD player (CD/ CD-R compatible) as an additional feature.

Like all the other models in the range, it also has front panel illumination that can alternate between blue, red and purple. The new "Sensitive Touch" front panel not only makes for gentler usage, it also groups the most useful functions together.

Thanks to Bluetooth AD2P, the MP 204 BT can be paired with any Smartphone to let you enjoy hands free and audio streaming. Your phone becomes a new audio source so that you can listen to your favorites mp3 files through your car radio. The package include an external microphone to set on your dashboard so that you can call your family and friends safely.

Like all of the 2010-2011 vintage car radios, only a small part of the front panel can be detached. This enables easy transport with no compromise on safety.

Main points

- CD player compatible with CD, CD-R, CD-RW
